

HAMDANI HAMKA

Web Developer · Bot Developer · IT Support Specialist

Duri, Riau, Indonesia • +62 821-7208-5318 • hamdaniamka@gmail.com • github.com/Hamznana • hamdani.vercel.app

PROFESSIONAL SUMMARY

Solution-focused Web Developer and IT Support Specialist with hands-on enterprise internship experience at PT. BDSI (Bohai Drilling Service Indonesia) and a certified **Junior Web Developer** credential. Demonstrates solid competency in hardware troubleshooting, network maintenance, client-side React/JavaScript development, and Python bot automation. Authored and deployed 17+ public GitHub repositories with automated CI/CD via GitHub Pages and Vercel.

PROFESSIONAL EXPERIENCE

PT. BDSI (Bohai Drilling Service Indonesia)

Duri, Riau, Indonesia

IT Support Intern

Internship Period

- Delivered day-to-day IT technical support for corporate personnel, resolving hardware, operating system, and software incidents with minimal downtime.
- Conducted systematic diagnostics and repairs on company laptops, desktop workstations, and peripheral equipment.
- Configured, installed, and maintained local network printers, ensuring seamless multi-user document workflows.
- Monitored and maintained local area network (LAN) and wireless (WLAN) connectivity, ensuring stable and reliable office communications.

Independent Web & Bot Developer

Duri, Riau, Indonesia

Open Source Creator & Freelance Developer

2023 - Present

- Engineered and launched responsive web applications using React.js, JavaScript (ES6+), and Tailwind CSS.
- Developed custom Telegram automation bots using Python and Node.js for automated customer inquiry routing and notifications.
- Managed automated deployment pipelines directly through GitHub Pages and Vercel cloud hosting.

SELECTED TECHNICAL PROJECTS

Hamnime - Anime Discovery & Streaming Web Application

Live Deployment

Tech: JavaScript, HTML5, CSS3, REST API, GitHub Pages

hamznana.github.io/Hamnime

- Built a high-performance web platform featuring live search indexing, genre filtering, and dynamic content rendering.

VORTEX-FUTSAL - Arena Reservation & Schedule Management

Live Deployment

Tech: JavaScript, Vite, Responsive UI, GitHub Pages

hamznana.github.io/VORTEX-FUTSAL

- Engineered an intuitive booking portal with interactive court schedule visualization and real-time validation.

Noir-Coffee & Telegram Bot Suite (Lucky-Bot-Tele, ubatob_bot)

Live Deployment

Tech: Python, Node.js, Telegram Bot API, Tailwind CSS

github.com/Hamznana

- Created modular automation bots handling webhook event listening, scheduled message dispatches, and user query automation.
